

NIMS Compliance 2010

The 2010 NIMS implementation guidance remains the same as in previous FYs 2008 and 2009. Users need to review, update (as appropriate), and save their responses to each implementation metric. Once complete, users will need to "Submit for Rollup" to record your jurisdiction's responses. Additionally, State, tribal, and local governments following the Five-Year NIMS Training Plan, can now use NIMSCAST to assess and report on the following NIMS Implementation Objectives pertaining to the following courses: IS-701: NIMS Multiagency Coordination System, IS-702: NIMS Public Information Systems, IS-703: NIMS Resource Management, IS-704: NIMS Communication and Information Management. For additional information on the Five-Year NIMS Training Plan, select "Five-Year Training Plan" available below or visit the [NIMS Resource Center](#).

Guidance information and link to the FEMA Emergency Management Institute (EMI) on the training is available for review and download below:
